

THE TRANSFORMATIVE LEADERSHIP COURSE (TLC)

Module 3: Managing Ecosystems

REVAMP YOUR ENVIRONMENT

Turn your passive work or home environment into an enthusing, response-able ecosystem-for-change.

**A productive and healthy ecosystem cannot be left to chance.
Ensure that your systems are adapted for success.**

The purpose of this module is to guide you in how to design an ecosystem-for-change by implementing the HOOS (Human Optimisation Operating System).

Assign the right task to the right person and make sure everyone takes ownership and responds appropriately to ensure optimum output.

This module provides guidance on optimising the structure and function of any ecosystem, ensuring it continuously improves towards higher efficiency and response-ability.

TLC MODULES

Module 1: In person
It's All in Your Mind

Module 2: Online
Task-Man-Fit

Module 3: ← You are here
Managing Ecosystems

Module 4: On a Farm
Leading Change

A BIT ABOUT YOUR PROVOCATEUR

Vivienne Schultz

A2B VISIONARY FOUNDER

About Vivienne

Vivienne Schultz is a change-maker, leader, and influencer in the public and private sectors of Southern Africa. She coined the term and concept Occupational Intelligence and works in the field of social entrepreneurialism. She is an Ashoka fellow, a Babson College (BOS, MA) graduate, public speaker, and an established author.

The Journey to Now

In 1986 Vivienne completed her Occupational Therapist degree at the University of Pretoria and went on to work for several medical and psychiatric institutions. Throughout her practising years she witnessed and worked with individuals, and often children, who were traumatised and debilitated by their tough life experiences and mental health challenges. Her exposure to the fragile side of humanity sparked a deep desire to help and facilitate change. It is this spark that activated her volition and propelled her to start the A2B Transformation Movement.

A Bit About A2B

A2B is an innovative methodology that masters the art of transforming humans by equipping them with training and tools to help them grow, succeed, and lead in their private and professional lives. A2B uses a neuro-behavioural human optimisation methodology.

This methodology starts by teaching the inside mechanics of the human brain and how to gain control over the things that are inhibiting people from becoming Optimum Humans (OH).

The backbone of the A2B methodology is Occupational Intelligence (OI). OI is a broad intelligence that encompasses all other intelligences. Optimal OI involves all the higher-level intelligences such as abstract thinking, problem solving, decision making, emotional understanding, creativity, and adaptation.

Furthermore, A2B guides humans toward becoming self-starters, initiators, and job-creators.
